

INDUSTRIAL ENGINEERING PRODUCTS BY ALL-PRO FASTENERS™

IT ONLY STARTS WITH NUTS & BOLTS™

All-Pro Fasteners is the reliable, single-source supplier providing a wide range of products to meet the needs of the industrial engineering and construction industry. We cover everything from industry-standard fasteners to unique manufactured specials—with in-house capabilities including All-Pro's certified manufacturing center and our fully accredited Quality Assurance Lab. Our expert services and customer support are all built around maximizing quality while lowering production waste and cost.

ALL-PRO CAPABILITIES

All-Pro Fasteners provides the capabilities to make the supply chain simpler for customers, and we work directly with you to provide products that meet exacting specifications. With our in-house Quality Assurance Lab with A2LA accreditation, we follow strict industry standards and regulations — so customers know every product All-Pro manufactures and distributes is subject to proper testing prior to shipping.

QUALITY ASSURANCE AND TESTING CAPABILITIES

APF takes every measure to ensure industrial engineering products meet strict standards for performance and reliability. We have extensive quality assurance and testing capabilities including...

ROTATIONAL CAPACITY TESTING

This test is designed to evaluate the presence of a lubricant, and the efficiency of the lubricant, as well as the compatibility of bolt assemblies as represented by the components selected for testing. APF quality experts make sure the desired bolt tension is achieved without excessive plastic deformation. We can perform rotational capacity testing in-house, with the support of our fully accredited Quality Assurance Lab, prior to shipping.

THE APF DIFFERENCE™

All-Pro Fasteners is here to provide customers one point-of-contact, one purchase order to issue, and one supplier to count on. Our sales managers are category experts in the industrial engineering market, and designated account managers assist with any size order. The scope of our operations, along with our laboratory quality management system and company certifications, help ensure the higher level of product quality and service customers expect from us. With our quality assurance program, we can guarantee complete confidence when purchasing any critical application and safety-related products. That's the APF Difference.
