

The background of the top half of the page is a large, semi-transparent red image of a tractor, likely a combine harvester, in a field. The tractor is facing right and has a large front wheel and a smaller rear wheel. The red tint is uniform across the entire background image.

OEM PRODUCTS BY ALL-PRO FASTENERS™

IT ONLY STARTS WITH NUTS & BOLTS™

All-Pro Fasteners supports all levels of the OEM industry including industrial engineering, utilities, agriculture, and more. As the single-source supplier of threaded, non-threaded standard, and custom-made fasteners, we have the resources to support both low- and high-volume production applications. All-Pro also offers value-added services including Vendor Management Inventory (VMI) programs ranging from bin stock and vending machines to on-site and integrated supply. All done to make supply chain management simple for customers, while saving time and cutting down costs.

ALL-PRO CAPABILITIES

All-Pro provides a full range of in-house capabilities to support OEM projects of all sizes. With All-Pro's certified, full-service manufacturing center on-site, we also supply specialty machined parts manufactured to exact specifications. We follow all customer requirements and per-spec materials and finishes, as well as offer additional service options that include anodizing, assembly, burnishing, drilling, grinding, painting, passivating, plating and polishing.

- Rivets
- Clips, Connectors & Clamps
- Cables & Chain
- Specialty Machined Items

Visit APF.com/Product-Lines for a full list of available products or call directly at 800-361-6627.

QUALITY ASSURANCE AND TESTING CAPABILITIES

APF takes every measure to ensure OEM products meet strict standards for performance and reliability. We have extensive quality assurance and testing capabilities including...

PROOF LOAD AND TENSILE TESTING

Our quality experts use proof load and tensile testing to guarantee products can withstand specific loads (defined by size and grade/property class) without permanent or measurable deformation. Proof load testing is typically performed between 90-93% of the expected minimum yield strength. APF can test any grades and sizes in our fully accredited Quality Assurance Lab, including full-size bolts up to 400,000 lbs. and machine specimens for bolts that exceed 400,000+ lbs.

THE APF DIFFERENCE™

All-Pro Fasteners is here to provide customers one point-of-contact, one purchase order to issue, and one supplier to count on. Our sales managers are category experts in the OEM market, and designated account managers assist with any size order. The scope of our operations, along with our laboratory quality management system and company certifications, help ensure the higher level of product quality and service customers expect from us. With our quality assurance program, we can guarantee complete confidence when purchasing any critical application and safety-related products. That's the APF Difference.
