

STRUCTURAL STEEL PRODUCTS BY ALL-PRO FASTENERS™

IT ONLY STARTS WITH NUTS & BOLTS™

All-Pro Fasteners is the single-source supplier with the capabilities to provide standard or custom fabricated products for all areas of infrastructure and structural steel applications. Our facilities feature All-Pro's certified manufacturing center and a fully accredited Quality Assurance Lab both on-site—with the category experts and product specialists to assist at every step. For help with federally or state funded projects, we also offer fully traceable fasteners that are manufactured only in the United States.

ALL-PRO CAPABILITIES

Whether customers need industry-standard products or manufactured specials, All-Pro Fasteners has the capabilities to handle any size order—and make the supply chain simpler in the process. Our products are fully compliant with the standards and regulations set by the American Institute of Steel Construction (AISC), American Association of State Highway and Transportation Officials (AASHTO), and American Society for Testing Materials (ASTM) specifications of A325 and A490 bolts.

QUALITY ASSURANCE AND TESTING CAPABILITIES

APF takes every measure to ensure products for structural steel applications meet strict standards for performance and reliability. We have extensive quality assurance and testing capabilities including...

ROTATIONAL CAPACITY TESTING

This test is designed to evaluate the presence of a lubricant, and the efficiency of the lubricant, as well as the compatibility of bolt assemblies as represented by the components selected for testing. APF quality experts make sure the desired bolt tension is achieved without excessive plastic deformation. We can perform rotational capacity testing in-house, with the support of our fully accredited Quality Assurance Lab, prior to shipping.

THE APF DIFFERENCE™

All-Pro Fasteners is here to provide customers one point-of-contact, one purchase order to issue, and one supplier to count on. Our sales managers are category experts in infrastructure and structural steel, and designated account managers assist with any size order. The scope of our operations, along with our laboratory quality management system and company certifications, help ensure the higher level of product quality and service customers expect from us. With our quality assurance program, we can guarantee complete confidence when purchasing any critical application and safety-related products. That's the APF Difference.
