

Steel Connections

For over 75 years Lindapter has pioneered the design and manufacture of quality steel connection solutions, providing a unique and proven concept: innovative clamping systems that eliminate the need to drill or weld steel sections, reducing installation time, and labor costs. Lindapter connections and Girder Clamps are ideally suited for both new construction and the refurbishment of existing structures

Model Number	Dimensions	Description
Type A	3/8" – 1"	Clamp with recessed top; Malleable iron; Bright zinc plated; Hot dip galvanized
Type AF	1/2" – 1"	High friction clamp; SG iron; Hot dip galvanized
Type AFCW	1/2" – 3/4"	Packing used to adjust tail length of clamp AF; Mild steel; Hot dip galvanized
Type AFP1 / AFP2	1/2" – 1"	Packing used to adjust tail length of clamp AF; Mild steel; Hot dip galvanized
Type B	3/8" – 1"	Clamp with flat top; Malleable iron; Bright zinc plated; Hot dip galvanized
Type BR	1/2" – 1"	Versatile clamp for beams or rails; Malleable iron; Bright zinc plated; Hot dip galvanized
Type CF	1/2" – 3/4"	High friction clamp; SG iron; Hot dip galvanized
Type CW Clipped Washer	1/2" – 1"	Packing used to adjust tail length of clamps A/B; Mild steel; Bright zinc plated; Hot dip galvanized
Type D2	3/8" – 1"	Adjustable clamp with recessed top; Malleable iron; Bright zinc plated; Hot dip galvanized
Type D3	3/8" – 1"	Adjustable clamp with flat top; Malleable iron; Bright zinc plated; Hot dip galvanized
Type F9	3/8" – 1"	Flange clamp for parallel steelwork; Malleable iron; Bright zinc plated; Hot dip galvanized
Type FC Flush Clamp	5/8"	Forged steel; Bright zinc plated; Plus JS500
Type LR	3/8" – 1"	Self adjusting clamp; Malleable iron; Bright zinc plated; Hot dip galvanized
Type LS	3/8" – 3/4"	Self adjusting clamp; Cast stainless steel; Grade 316
Type P1 short / P2 short	1/2" – 1"	Packing used to adjust tail length of clamps A/B; Mild steel, malleable iron; Bright zinc plated; Hot dip galvanized
