

MRO PRODUCTS BY ALL-PRO FASTENERS™

IT ONLY STARTS WITH NUTS & BOLTS™

All-Pro Fasteners has extensive experience servicing the MRO industry, ranging from agriculture and utilities to industrial engineering and more. As the reliable, single-source supplier of professional-grade industry products, we meet customer demands on everything from standard orders to per-spec manufactured products. Supported by our certified, on-site manufacturing center. At All-Pro, our experts work directly with customers to help streamline your operations. That means minimizing production waste, lowering costs, and reducing in-house inventory requirements wherever possible.

ALL-PRO CAPABILITIES

All-Pro makes the supply chain simpler by providing everything from industry-standard nuts and bolts and industrial supplies to manufactured specials. We offer a comprehensive inventory of threaded and non-threaded fasteners, adhesives, accessories, and supplies for production and non-production applications. With the support of our on-site, A2LA-accredited Quality Assurance Lab with ISO 17025 certification, All-Pro is the supplier of choice when it comes to MRO.

QUALITY ASSURANCE AND TESTING CAPABILITIES

APF takes every measure to ensure MRO products meet strict standards for performance and reliability. We have extensive quality assurance and testing capabilities including...

HARDNESS TESTING

The hardness test is extremely useful in material selection. It provides APF experts a specific value indicating how easily a material can be machined, and how well the material will hold up to wear over time. Material hardness testing is also valuable for making product decisions regarding various treatments and coatings options. APF performs all hardness testing in-house, with the support of our fully accredited Quality Assurance Lab, prior to manufacturing.

THE APF DIFFERENCE™

All-Pro Fasteners is here to provide customers one point-of-contact, one purchase order to issue, and one supplier to count on. Our sales managers are category experts in the MRO market, and designated account managers assist with any size order. The scope of our operations, along with our laboratory quality management system and company certifications, help ensure the higher level of product quality and service customers expect from us. With our quality assurance program, we can guarantee complete confidence when purchasing any critical application and safety-related products. That's the APF Difference.
