Global & Domestic Sourcing

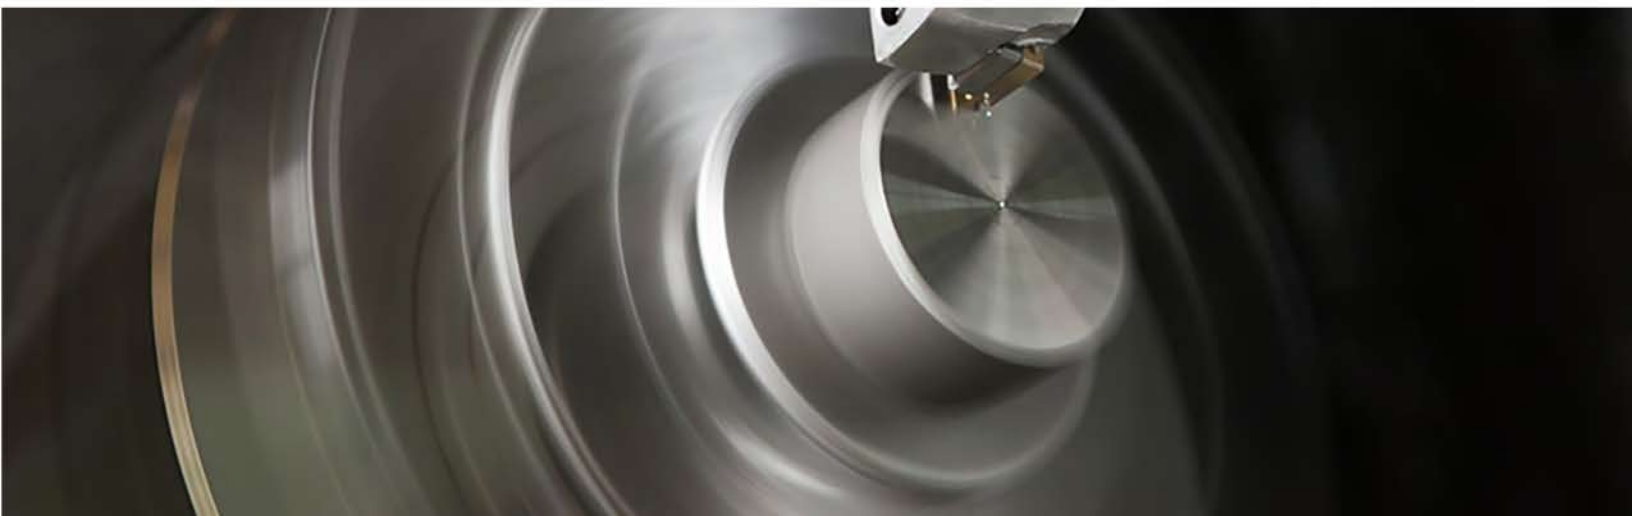

All-Pro Fasteners partners with key domestic and global suppliers to provide a cost-effective and reliable supply of fasteners and related products. The company's strategic sourcing process involves analyzing the supplier market, identifying and integrating quality suppliers into a supply plan, and then monitoring program performance for improvement opportunities.

Supporting this effort, APF experts are ready to work with you to develop supply programs that include on-time and on-budget purchasing, along with supply chain management solutions.

Domestic Manufacturing

The company's domestic manufacturing arm, All-Pro Threaded Products™ (AFTP), can manufacture unique or difficult-to-source fasteners and related hardware, whether standard, per-print custom, or non-standard products (imperial or metric). An ISO 9001 and API Q1-certified operation, AFTP also holds the America Petroleum Institute API 20F-002 and API 20E-0016 Monogram Licenses to manufacture API 20E BSL-1, BSL-2, and BSL-3 bolting. These certifications provide customers with confidence in even the most critical applications and

Customer Support

APF provides customers with additional product support options to handle all project requirements, including engineering support, parts consolidation, and design/assembly assistance for new products. In addition, All-Pro further supports its customers by hosting lunch and learn training sessions, offering alternative product recommendations, and providing strategies for cost savings.

All-Pro also offers many secondary processing services, including fastener drilling, painting, coating, plating, assembly of parts, and more. By counting on All-Pro for these processes, companies can often make better use of both physical and personnel

VMI Services

To optimize the efficiency of fastener supply chains, All-Pro Connect's™ Vendor Management Inventory (VMI) service maintains optimal stock levels and reorder points, without shortages or excessive inventory. APF can also help eliminate redundancies and inefficiencies in supply chains, providing a systematic approach to controlling fastener inventory.

Kitting & Assembly Services

All-Pro provides customized kitting solutions and preassembly options for fasteners and hardware, ensuring exact counts and ease of shipping. These solutions reduce the need for multiple POU storage locations, optimizing your facility's geographic footprint.

Pre-packaged, labeled, and bar-coded kits enhance productivity and simplify assembly for ready-to-assemble goods, equipment, and product installations.

Quality Assurance/Quality

All-Pro Fasteners offers a broad range of certified quality assurance programs, meeting the requirements of ISO 9001:2015, Mil-I-45208, ISO/IEC 17025, ANSI/ASME, API Q1, and ASTM specifications. All testing is handled in-house, using the company's A2LA-certified testing lab. Protocols include fatigue, adhesion, and bend testing, along with shear stress and Charpy impact testing,

All-Pro Fasteners™

For nearly 50 years, All-Pro Fasteners™ (APF) has delivered reliable fastener supply solutions from its facilities across the central U.S. Through the All-Pro Connect™ program, APF sets new standards in efficiency and quality – combining sourcing and manufacturing, with advanced VMI, kitting, and custom administrative processes.

We welcome you to contact us and learn more about how All-Pro Connect™ by All-Pro Fasteners can deliver better fastener supply solutions to your organization.
