

Manufacturing. Sourcing. Services. Solutions.™

All-Pro Connect™ Consignment Program

Vendor-Managed, Digital-Traceable

Pay Only for What You Use. Never Carry an Inventory, But Never Run Out.

All-Pro Fasteners is more than a distributor. The company is your partner in manufacturing and sourcing services for fasteners and related hardware. The company's All-Pro Connect™ Consignment Program delivers true just-in-time fastener supply at no upfront cost and with complete digital traceability, helping you manage fastener supply cost-effectively, with zero disruptions.

Key parts of this program include:

Creating a Dedicated Consignment Location for Your Product

We establish a customer-specific bin in our system so every unit held exclusively for you is tracked in real time, 24/7.

Custom Barcoded Labeling at No Extra Charge

Material arrives at your facilities ready to scan with barcodes containing:

- Your Part Number
- Heat Number
- Quantity
- Expiration Date
- Manufacturer Lot #
- Any additional data you require

Your Personalized Scan Screen

We customize our mobile app exactly to your process. Add Job #, PO #, Work Order, Project, Operator – whatever fields you want to be captured and shown on every invoice.

No New Hardware Required

Your team simply downloads the free APF Consignment app to any iOS or Android smartphone or tablet already in use on the floor.

One-Scan Consumption

Material is pulled, barcode scanned, quantity entered, required fields completed, and "Submit" tapped. That's all it takes to process the order.

Instant Electronic Order & Confirmation

Your purchase is transmitted immediately. Your purchasing and quality teams receive an automated email with complete order details, eliminating the need to chase paperwork and misplace orders.

Invoices Mirror Point-of-Use Data

Every invoice reflects exactly what was captured at the moment of use: Part #, Lot #, Heat #, Job #, Timestamp, and all custom fields. Traceability information is automatically included.

The APF Consignment Advantage

Overall, the All-Pro Consignment program offers a number of advantages, ultimately leading to an efficient, reliable, and cost-effective fastener and sourcing program. Key benefits of the program include:

- 1 Eliminates stockouts and line-down events
- 2 Requires payment only for material actually consumed
- 3 Frees up working capital—no inventory on your books
- 4 Provides 100% lot-to-job traceability with zero added effort
- 5 Dramatically reduces purchasing and receiving workload
- 6 Delivers real-time product usage data for better forecasting

Zero Risk. Fast Results.

You build a product. We own the inventory until the moment you use it. With domestic manufacturing, global sourcing, and comprehensive solutions, All-Pro can make a positive difference in your fastener supply chain.

**The right fastener. The right time.
The right price—only when you use it.**

A Comprehensive Approach to Fastener Supply

Our capabilities extend beyond distribution and consignment services – we believe in leveraging our total capabilities to provide customers with long-term savings.

Our manufacturing facility, located in Arlington, Texas, is capable of producing a wide range of fasteners and related hardware. When customers require difficult-to-source or custom pieces, our ISO-certified facility steps in to rapidly fill supply chain gaps until a permanent source is located.

The hardware we provide undergoes testing at our industry-leading, A2LA-certified quality assurance lab. We offer a broad range of advanced testing capabilities, with material test reports available. It's all to ensure that the pieces we provide are of the highest quality.

In addition to consignment services, we offer a comprehensive range of value-added services to enhance our customers' operations, including VMI/JMI, kitting, and stock and release. We also offer a number of secondary processes – platings and coatings, heat treating, and related manufacturing and assembly processes.

Together, our capabilities form a truly comprehensive approach to fastener supply, which we call All-Pro Connect™. Our truly turnkey approach yields simple results for our customers – long-term savings, increased efficiency, and an optimized fastener supply chain.
